Job Title: Senior Project Supervisor, Construction Engineering
Competition #: SW-20-2026
Location: Saskatoon (On-Site)
Salary: $40.52 to $50.66 per hour (Pay Grade 10)

Immerse yourself in a team committed to creating trusted and sustainable water solutions for a vibrant Saskatchewan. A team backed by a corporation with over 60 years of experience providing water and wastewater services. That's a lot of knowledge.

But there's more. SaskWater offers an attractive benefits package including employer-funded health, dental and vision benefits, pension, and disability insurance, plus vacation leave, earned days off, and paid family leave and sick leave. At SaskWater you can take advantage of extras such as flexible work options, a tuition reimbursement program, employee family assistance plans, maternity leave top-up and more. H2Wh0a!!

Now that's refreshing! Apply today.

As the Senior Project Supervisor, you will provide senior engineering technology services either for an entire project or for phases of projects, related to the investigation, design, construction and maintenance of water or wastewater supply, distribution, disposal, and treatment projects.

Key Duties and Responsibilities

The Senior Project Supervisor oversees contractors and consultants on water and wastewater construction and maintenance projects of varying size and complexity. Administers contracts, prepares technical documents, manages construction costs, coordinates tendering, awards, procurement, and quality surveys, and conducts inspections to ensure deficiencies are corrected. Maintains communication with customers, agencies, and affected parties throughout each project.

This position will coordinate investigations for water and wastewater projects by identifying needs and risks, recommending solutions, and preparing technical reports, documents, and drawings. Supports project design and cost estimating using industry standards and established pricing. Provides project management support by reviewing designs, costs, reports, and drawings prepared by other engineering agencies.

The role coordinates, supervises, or conducts preliminary, construction, and post-construction surveys, ensuring accurate and complete data that meets established engineering practices. Develop civil engineering software tools and drawing templates and produces engineering and corporate drawings and details for construction projects.

This position prepares and finalizes land purchase and easement agreements for temporary and permanent rights-of-way, including negotiations with landowners. Supports research and development to implement or improve engineering and technical processes, procedures, and

standards. Participates on internal and external committees and helps coordinate corporate activities with governments, associations, and other stakeholders. This position will also supervise and trains staff in engineering methods and techniques and performs other assigned technical duties.

To qualify, you will have a Diploma in Civil Engineering Technologist or similar discipline, certification as a Professional Technologist (P.Tech) and a valid Class 5 Driver's License.

In addition to the above qualifications, the job requires 4 years of progressively more responsible experience in the following areas:

- Working knowledge of standard engineering practices and procedures; their application to the design and construction of water and wastewater projects; relevant construction and survey procedures, methods, and standards; the principles and practices of contract administration; applicable engineering software programs; the materials and equipment used in project construction and of conventional, electronic and GPS survey equipment, procedures, and standards.
- Proficiency in drafting techniques and demonstrated ability to use AutoCAD Civil 3D software.
- Demonstrated ability in writing letters, reports and inspection reports and supervising contractors hired to undertake maintenance work.
- Ability to establish and maintain effective working relationships with staff, external customers, and service suppliers and to promote and maintain a positive corporate climate.
- Ability to supervise and train staff.

Special Requirements: *The position requires the incumbent to undergo a Criminal Record Check and Drug and Alcohol test. You must be legally entitled to work in Canada. A valid Saskatchewan driver's license is required.*

Application Deadline

November 4, 2026 at 5:00 p.m.
